

Korroboree Learning Management System

Korroboree is looking for a perfect turnkey solution to build an online eLearning marketplace using modern technologies that support readymade self-paced courses, interactive live video classes for real-time learning, virtual classroom experience, e-commerce store and other features to offer a comprehensive toolset to carve a niche for itself.

The platform should support analytics and reports generation to give deep insight into the business with metrics such as registered learners, registered tutors, courses, live-classes, sales, and payment analytics, etc. The platform should be capable of implementing new features and updates as per changing trends and customer requirements as and when needed to deliver the best in class experiences to the stakeholders.

Korroboree eLearning marketplace will have innovative features, optimised user-interface, self-hosting, and multiple revenue channels to generate income from various sources. The scalability to accommodate new features on demand will be in-built to support the business growth. This document provides brief description of feature sets to explore the most important features and aspects of Korroboree eLearning Platform.

KEY DELIVERABLES

Web application:

- Comprising the feature for learner/student to browse the site, access courses, register, sign in, purchase courses and access the dashboard
- For tutors to register, login, create courses, access dashboard and other activities related to tutoring and course management.
- Admin dashboard to manage the platforms, course, interactions and engagement required for the platform operation

Mobile application

- Android and iOS mobile app for learners/students to browse the courses, webinars, access their courses, attend the course/live class, etc.

Following is a high-level overview of the highlighting features of Korroboree eLearning platform:

HIGH SECURITY

Highly secure platform with features to eliminate spam and keep all kinds of private information safe. We know how important it is to keep learning safe for students.

AUTOMATIC WORKFLOW

Automated workflow ensures that the planned software can handle as many students, tutors, and traffic on the platform. Platform will be capable of upscaling your business without worrying about excessive manual work.

EXTENSIVE ADMIN PANEL

The software will provide full control of a versatile admin panel. The admin has access to in-depth reporting tools, and the ability to personalize the experience from the admin panel. View user details, tutor details, date registered, courses, sales details, learning management, and a lot more from a central dashboard.

SEARCH ENGINE OPTIMIZED

Every aspect of Korroboree is SEO friendly. You'll have an easier time being crawled by search engines such as Google and Bing.

MULTIPLE REVENUE CHANNELS

The software will be provided with an assortment of revenue channels that covers all modern revenue generation methods such as self-paced course selling, Live video classes, products, games, educational software and Featured listings, etc.

SOURCE-CODE ACCESS

To provide full source-code access.

FULLY CUSTOMIZABLE

The solution will be 100% customizable. Skilled software developers can easily modify the code and add additional features as may be required.
